Over 800 man-hours were devoted to the care and maintenance of the 17 pump stations. A weekly maintenance and upgrade program continues, and preventive maintenance remains a top priority. Each month, crews drive our various water and sewer right-of-ways to observe any possible problem areas. Crews are also sent out monthly, and some-times weekly, if time permits, to inspect manholes around Town. Sewer and water right-of-ways are also cut at least three (3) times a year.

Water & Sewer Maintenance Department and Street Department workers on "Stand-By Call" responded 88 times to after-hour emergencies during 2004. This is generally in line with past years.
